Invoicing, Payments, Taxes, and Collections

FICTIONAL TRAINING DOCUMENT — designed for RAG/agent testing; no real company, policy, SLA, customer, or price is represented.

Cycles and invoice anatomy

Monthly subscriptions renew on the original paid activation day; legacy accounts created before 1 Jan 2026 may invoice on the first calendar day. Annual plans renew on the activation anniversary. Invoice timestamps use UTC. Lines may include base fee, seats/usage, proration, credits, tax, applied payments, and balance.

ID	Example	Meaning
Invoice	INV-2026-008821	Issued financial document
Payment	PAY-773104	Attempt/settlement
Credit memo	CM-2026-00193	Approved balance reduction
Subscription	SUB-592044	Commercial subscription
Account	ACC-482193	Customer account

Payment methods and retries

Self-service accounts may use cards and supported bank debit. Approved Enterprise accounts may pay by bank transfer. Eligible failed card payments retry after approximately 1, 3, and 7 days. After the final failure the subscription enters Past Due; suspension may occur five days later unless contract terms differ.

Bank transfer and taxes

Default Enterprise terms are Net 30 unless the order form overrides. Include Invoice ID in transfer reference; reconciliation may take 2-5 business days after funds arrive. Tax uses sold-to address, recorded tax status, and applicable rules at invoice creation. Valid exemption/VAT documentation should be recorded before issuance; Billing can correct qualifying invoices.

Disputes

Open billing disputes within 30 days of invoice date. Review subscription/order, plan and seat history, metering, credits, tax data, and payment records. A dispute does not automatically suspend collection of undisputed amounts.

Credits, dunning, and restoration

Credit memos cover confirmed billing errors, approved service credits, duplicate charges, and approved adjustments. Credits normally reduce account balance first; cash refunds follow separate refund rules.

State	Typical impact
Open	Invoice issued; no service impact.
Due	Due date reached; no immediate impact.
Past Due	Notices/retries continue.
Suspension Pending	Warning banner/admin notice; typically ~5 days after Past Due.
Suspended	Most production actions blocked; data retained.
Collections/Closed	Billing review required before restoration.

Successful card settlement normally restores self-service access within 15 minutes. Bank transfers may require manual reconciliation. If payment is confirmed but access remains blocked after 30 minutes, Billing verifies commercial state, then routes remaining access/platform symptoms to Support or Technical.

Billing evidence checklist

• Account, Subscription, Invoice and Payment IDs.

• Amount/currency, invoice date, due date, payment method, payment timestamp.

• Seat/usage/proration lines in dispute and expected amount.

• Tax/VAT documentation effective date where relevant.

Examples

Bank transfer without reference: search by amount/date/legal entity/payer before applying; Support must not manually alter subscription state. **Employee left mid-month:** check seat event history and terms; deactivation stops future consumption but does not automatically reverse already incurred charges. **Duplicate charge:** confirm settlement records before refund/reversal.

Agent boundary

Billing decides financial status, invoice correctness, refund/credit handling, tax adjustments, and collections. Support handles product/account guidance. Technical investigates platform defects that may have produced incorrect metering or payment behavior.
