Subscriptions, Plan Changes, Proration, Refunds, and Cancellations

Billing Agent | Knowledge Base 2026.10 | Primary retrieval domain: Billing Agent

FICTIONAL TRAINING DOCUMENT — designed for RAG/agent testing; no real company, policy, SLA, customer, or price is represented.

Fictional plans

Plan	Base/month	Included seats	Support
Starter	EUR 49	10	Standard business-hours
Growth	EUR 199	50	Priority business-hours
Enterprise	Contracted	Contracted	Contract-specific; P1 24x7

Prices exclude tax and are fictional. Signed Enterprise order forms override general KB pricing and terms.

Upgrades and proration

Self-service upgrades are immediate. Credit the unused old-plan value for the remaining cycle and charge the new-plan value for the same period. Example: EUR 199 → EUR 299 halfway through a 30-day cycle gives about EUR 99.50 unused old value and EUR 149.50 new value, producing ~EUR 50 net charge before tax.

Downgrades and seats

Downgrades normally become effective at next renewal to avoid mid-cycle feature/limit conflicts. Seat additions above included quantity are prorated from activation. Removing/deactivating a seat stops future recurring charges under reconciliation rules but does not automatically refund prior usage.

Cancellation

Scheduled cancellation keeps service through the paid period and prevents the next renewal. Immediate cancellation is exceptional and may end access sooner. Annual/Enterprise commitments are governed by contract.

Refund eligibility

Situation	Typical outcome
Duplicate payment	Refund/reversal after confirmation
Confirmed billing error	Correction + refund/credit as appropriate
Approved unused prepaid time	May be refundable if contract permits
Forgotten cancellation after renewal	No automatic refund; goodwill review
Consumed usage	Normally non-refundable
Service outage	Usually service credit, not cash refund

Goodwill and pauses

A Billing lead may approve one goodwill refund for a recent renewal if contact occurs within seven calendar days, renewed service was not materially used, and there is no repeated-goodwill pattern. Contract terms can override. Pauses exist only for selected annual/seasonal arrangements; document start/end and renewal adjustment.

Refund processing

Approved card refunds are submitted within two business days and typically appear at the bank within 5-10 business days. Bank-transfer refunds may require beneficiary verification. Distinguish **approved**, **submitted**, and **received**.

Renewal reminders

Annual self-service plans receive a reminder 30 days before renewal. Monthly plans have no separate reminder. Enterprise notice periods follow the order form.

Outage-credit dependency

Technical confirms incident window, affected service/region, and outage/degradation facts. Billing checks plan/contract eligibility and calculates the credit. Support may communicate an approved result but should not promise compensation independently.

Decision examples

• Starter customer cancels two days after monthly renewal and continued using service: schedule cancellation for next renewal; no automatic cash refund.

• Same invoice charged twice due to confirmed payment defect: correct and return duplicate amount.

• Enterprise customer seeks early annual termination: signed order form controls.

• Customer requests refund because API was unavailable: treat as potential SLA/service credit unless contract or confirmed billing error supports cash refund.

Required data

• Account/Subscription/Invoice IDs; plan and renewal date.

• Requested effective date and whether service was used after renewal.

• Seat/plan-change timestamps and proration lines.

• Contract/order-form terms for Enterprise exceptions.
